

New chapter in Logistics.

I am happy to announce that André van Wezel and I have completed the acquisition of Friendship International B.V., an IATA certified forwarder specialized in air and seafreight with an office in Urmond, The Netherlands.

Friendship International has a history of excellent service levels based on client focus, continuous monitoring and personal dedication. These are characteristics which we recognize in our own DNA.

We thank the former owners Gabi Walter & Theo Mierling for their trust in us to continue their work. With their team, they have turned Friendship International into a solid logistics partner to rely on. They will stay on board for as long as necessary to ensure a smooth transition and continuity in the business relationships.

With Cas Kuypers joining as our first new team member, the family character of the company will remain intact.

I have been working with André for many years in the logistics business. This acquisition provides a new opportunity to combine our expertise and networks to further develop and expand the activities and service areas of Friendship International.

Marcel Kuypers
